/ , . !	Iran-Iraq: Situation Report Number 27	• •
DCI ExDir	(As of 0830 EDT 29 July 1982)	
ExSec		
Militar	y Situation	25X ⁻
DDI Tr	and the same of th	
	an last night launched the third phase of its invasion of attacking Iraqi defenses along the central portion of the	
	front.	25X
C/NIC		
NIO/W	The attack, which began at dusk last night (local time),	
NIO/NESA	centered around and just north of the area of the Iranian salient. Fighting continued all night and into this	
D/CPAS	morning morning	25X ⁻
DD/CPAS C/CSG	Tran claims the fermes are the state of the	
C/OpsCtr	Iran claims its forces overran the first line of Iraqi defenses and crossed a wide minefield.	267
CACTO	the initial objective of the	25)
S00 SWO	attack was to seize triangular strongpoints that anchor	<u> </u>
WA	Iraq's second line of defense.	25X′
NID		25X′
PDB D/NESA	the Iranian attack by this morning	25X1
<u> </u>	had been contained after a penetration of up to 5 kilometers. An Iraqi pincer counterattack by two	25X′
1770/077	divisions was proceeding well and the Tragis expected	
MIO/ GEE!	that the Iranians would be pushed back to their starting	
DDS&T/DO(2)	point by this afternoon (local time).	· 25X1
ITC	Preliminary analysis	25X1
FLS CRES	indicates that the primary battle area is	25X1
OCR	obscured by dust, and the battle line cannot be determined. Elsewhere along the Basrah front there is no	
	change in the front lines.	25X1
MECY (DC/3)		20/1
	Comment: Iran's chances of success in this phase of	
File'	their invasion are slim as long as they insist on using unimaginative heavy infantry assaults head-on against	
	neavily fortified Iraqi defenses backed by armored	
*	reserves. Iran has again chosen to attack along the	
	central portion of the Basrah front where Iraqi physical defenses are strongest. Plans for the second-prong of	
	the attack along the Shatt probably will not be executed
